-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase "said first end" in line 2 lacks a clear antecedent basis as do "whose one end" and "whose second end". Instead of the phrase "whose first end is said first end and whose second end is" a phrase like --having a first end and second end, said first end being said one end and said second end being—would be more clear.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Newman.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Newell in view of Newman.

It would have been obvious to attach the flanges between 32 and 52 in Newell with bolts in view of 86 in Newman since it is unclear how the flanges in Newell are attached.

Claims 4, 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Newman in view of German reference 41002.

It would have been obvious to provide an extension between the elements 36 and 38 in Newman in view of the teaching in the German reference. Note figures 7 and 8 of the German reference.

Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Newman in view of the following comments.

It would have been obvious to one having ordinary skill in the art to construct the front part in Newman of a cast component , since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Newman in view of Isom, et al.

It would have been obvious to substitute threaded holes in either flange in Newman for the bolts in view of the teaching in Isom. Note elements 24 in Isom.
